

PROFESSIONAL SUMMARY:

Computer Science student with solid experience in Python and Django. Passionate about backend development, API integration, and building scalable applications. Looking for internship/part-time opportunities in software development.

SKILLS:

Programming Languages : C, C++, Python, JavaScript

Front-End : HTML, CSS, Bootstrap, Tailwind CSS, React

Back-End : Django, Django REST Framework

Database : MySQL, SQLite, PostgreSQL ,SQL

Server Tools : VS Code, Codeblocks, Git, GitHub, Vercel, onrender

Soft Skills : Problem-Solving, Time Management & Adaptability

PROJECTS:

EventHub

[Live site](#) | [Client](#)

A centralized platform to create, manage, and attend university or organizational events. Users can register, RSVP, and manage event participation.

Key Features:

- JWT-based user authentication with role-specific dashboards
- Event creation, registration, approval system, and RSVP functionality
- Email notification and event filtering by category and date

Tech Stack: JavaScript, Tailwind CSS, Django, DRF, PostgreSQL

Roktofy

[Live site](#) | [Client](#) | [Server](#)

A modern blood donation platform connecting donors with receivers. It facilitates donor registration, blood request, and availability tracking.

Key Features:

- Custom user model with roles (admin, donor, receiver)
- Donation request handling, donor availability tracking
- Integrated account activation with email and real-time donor search
- Tech Stack: React, Tailwind CSS, Django, DRF, PostgreSQL

University Dining Management System:

[Server Site](#)

A Console-based project to manage university dining efficiently, supporting student record management, meal tokens, secure access, and file-based data storage for scalability up to 20,000 users

- Add, update, and delete student records
- Token management for lunch and dinner
- Secure meal access using passwords
- File-based data storage for reliability
- Scalable for large student populations

Tech Stack: C Programming

COURSE

CS Fundamentals –Phitron (March 2024–July 2025)

- Completed C, C++, DSA, OOP (Python), and full-stack web development with React.js, Tailwind CSS, Django, REST APIs, JWT, and PostgreSQL.

EDUCATION:

Bachelor of Computer Science and Engineering

2023 – 2026 | Mawlana Bhashani Science and Technology University

LANGUAGE

Bangla –Native

English – Fluent
